

Emulsifiers for cationic bituminous emulsions

Emulsifier Azol 1016 B (cationic type)

For slow disintegrating bituminous emulsions class EBC-3.

Usage - for Slurry Seal.

Dosage: 14-16kg / ton emulsion.

Emulsifier Azol 1016 D (cationic type)

For rapid and medium disintegrating bituminous emulsions class EBC-1 and EBC-2.

Usage: tack coating, jet-injection hole repairing and surface treatment (surface dressing).

Dosage for emulsions class EBC-1: 1.8-2.2 kg / ton of emulsion

for emulsions class EBC-2: 3.0-3.2 kg / ton of emulsion.
